

EasySecure Door

High security aluminium commercial door

The EasySecure door is a high security aluminium commercial door manufactured exclusively by leading Gloucestershire based trade fabricator CDW Systems. The product is an evolution of the tried and tested Sapa Stormframe Easyway door and meets increased standards of safety and security. EasySecure is suitable for new build, refurbishment, residential, educational and light commercial applications alike.

Design & Performance benefits

- Any hardware can be fitted to improve its security credentials.
- Co-extruded bead makes the glass more secure.
- Dual weathering around the door minimises air and water infiltration.
- New one piece anti-finger trap stile.
- New flat face anti finger trap stile for mounting panic bars.
- Suitable for manual or automatic operation.
- Can be manufactured to meet the requirements of Document M and BS8300 for disabled access.
- Can be fitted with special handles, pivot hinges, latch lock, master key systems, emergency exit devices; automatic door openers and electronic security systems.

These Developments to security and performance mean CDW Systems will be the only fabricator in the country to manufacture EasySecure.

Why EasySecure doors

- Specified with many local authorities and architects
- Fully fabricated – all preparation and fitting of hardware included
- Choice of framing systems thermal and non thermal
- Comprehensive colour range – over 200 colours available
- Built in external security beads
- Can be used in curtain walling screens

Sizing

Maximum Height	2400mm
Maximum Width	1200mm
Maximum Sash Weight	90KG
Performance	There are no recognised performance standards for air and water leakage through commercial doors. In keeping with industry recommendations, it is advisable to give special consideration to doors on exposed sites. High wind pressures can cause inadvertent opening of pivoted doors and consequent draughts and water penetration. It may be advisable under such circumstances to provide protection by means of a porch or lobby.
